

CHANGING LIVES THROUGH SPORT

November, 2025

Friends:

Next month will mark 26 years since I spoke at Cypress Elementary School to a group of 5th and 6th graders, which led to the start of our **Exceeding Expectations Foundation**.

In the years to follow, several of the early members have become parents and their children have become the next EE generation. Exceeding Expectations “kids” are now college graduates, members of the military and law enforcement, and outstanding athletes, some in college on sports scholarships.

One of the most rewarding outcomes has been the parental involvement. In the early day, family members had no reason to believe that their kids had the option of a better future and some discouraged their kids from taking part in EE. Today, a great many parents are engaged with the program and have the expectation that their kids will get an education and a better life.

The kids and their families work hard for their success, but we all recognize that none of this would be possible without your involvement and generous support – for which we thank you very much!

Enjoy some photos of the kids in action the past few – very busy! – weeks.

Challenged Athletes Foundation "Best day in Tri"

Our friends from the Santa Barbara Tri Club did the swim and bike portions of the relay. The EE kids finished up the triathlon with the run leg.

LA Tri Series - Bonelli Park

Tram Road Challenge, Palm Springs Aerial Tramway

San Bernadino Sheriff's Department Mud Run

Taping up the shoes

EE “kid” Enrique Campos Is a proud recruit in the Sheriff’s Department.
He’ll be sworn before year's end.

Run With Los Muertos!

Our guys swept the 12-and-under division.
9-year-old Damian (center) ran the 5K in 20:42!

Yoselin successfully defended her title as
Overall Female Champion

Click [here](#) for a gallery of more photos from this fun event.

Ahris Mayorga's (second from right) soccer team made the California Interscholastic Federation invitational tournament

Johana Alvarez, "You're in the Army now!"
(in El Paso, TX)

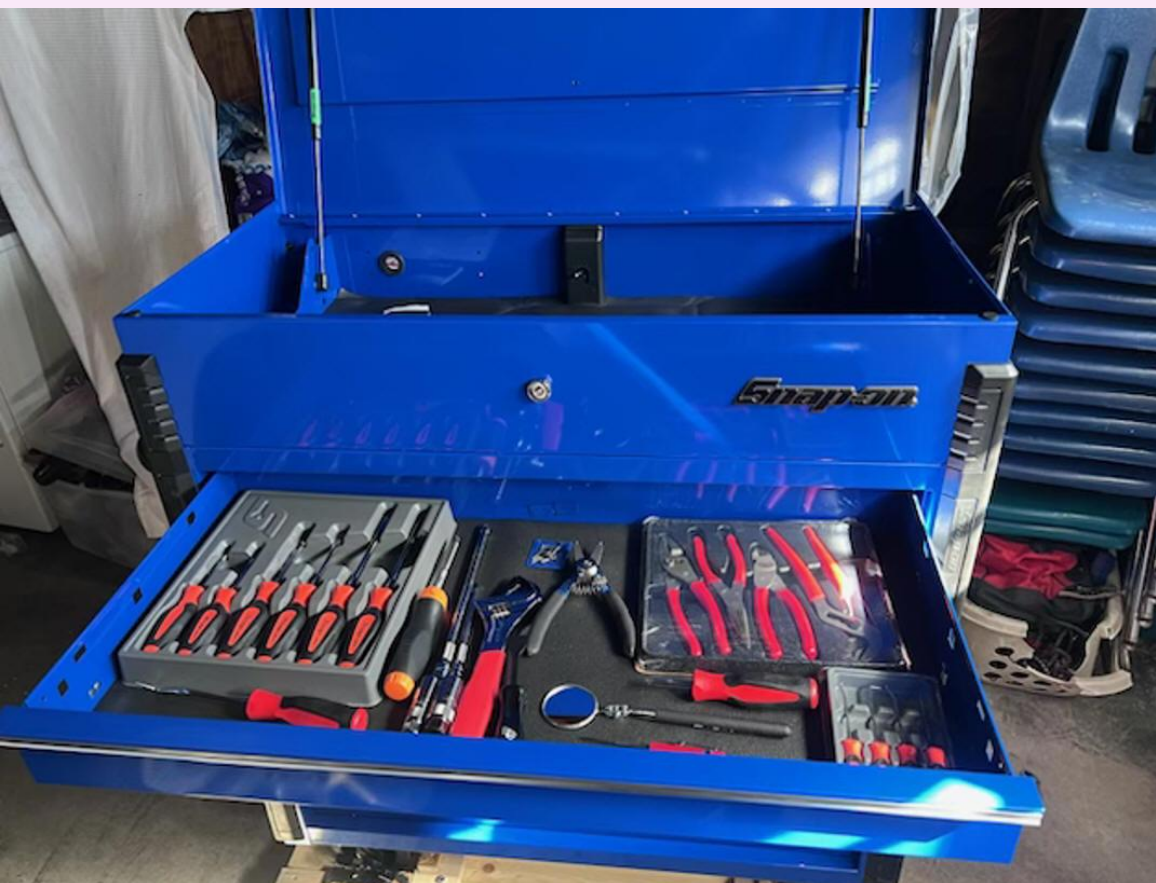

And Karen is in the Navy, here with her brother Miguel and sister Isi, both also EE team members.

Eduardo Alvarez graduated from Universal Technical Institute and is now fully certified to work on electric vehicles.

He has already started working for Ford, and EE bought him his first set of tools and a beautiful chest

Fernanda is a senior at San Diego State University. She'll have her business degree next May.
